GALILEE POND
T15 R9, Aroostook Co.
U.S.G.S. Gardner Pond, Maine (7 1/2')

Fishes

Brook trout

Minnows

Physical Characteristics

Area - 9 acres
Average depth - 14 feet
Maximum depth - 27 feet

Temperatures:
Surface - 63⁰F
100 feet - 48⁰F

Principal fishery: Brook trout

Galilee Pond is a small, coldwater lake with suitable water quality for brook trout. The trout fishery is maintained entirely by natural spawning within the pond and in the small inlet.

Brook trout were the only fish species present when the pond was initially surveyed. Minnows were first observed in 1990.

Conservative fishing regulations have been implemented to maintain and enhance the sport fishery.

Galilee Pond is one of many ponds situated in close proximity in T15 R9, a township owned by the State of Maine. Access to the pond is from Denny Pond via a one mile footpath through deciduous forest.

Surveyed - August 1954
